SLOTTED PLASTIC PIPE

Great Western Supply manufactures slotted plastic pipe for a variety of applications. We have the capability to slot pipe from 1" diameter to 12" diameter. Slots can be as narrow as .010" to as large as .375". There are numerous row patterns and spacing available depending on the diameter of pipe.

Standard PVC and CPVC pipe can be slotted, including Schedule 40, Schedule 80 and SDR rated pipe.

Common configurations are in stock. Custom slotted pipe is built to meet your requirements.

Perforated pipe is also available and can be manufactured to your required configuration.

All slotted pipe is manufactured to your required configuration based on the following information.

- Type of pipe.
- Diameter of pipe.
- Length of pipe.
- Rows of slots.
- Length of slots.
- Width of slots.
- Spacing of slots.
